José Samuel Rocha Oliveira

Cybersecurity, Software Development, Programming

sam.oliveira.dev@gmail.com | Porto, Portugal | Samuel Oliveira | Sam-Ciber-Dev

ABOUT ME

Computer Engineering student with training in Cybersecurity, focused on pentesting, OSINT, and threat detection. Hands-on experience in real-world security audits (OWASP WSTG/PTES), offensive tool development, and detection infrastructure (honeypots, ELK pipelines). Focused on OSINT and CTI, turning technical investigation into real impact through responsible disclosure and self-built tools.

WORK EXPERIENCE

Fin-Prisma, Lda. (Grupo EAD) 02/2026 – 07/2026
Internship in tool development, pentesting, and threat detection

- Security audits in real production environments, following OWASP WSTG and PTES, with vulnerabilities classified by CVSS severity and mapped to the OWASP Top 10.
- Development of Phoenix, an automated pentest framework with 30+ modules, and NexusGuard Scanner, for detecting compromised NPM and NuGet packages.
- Design of a honeypot ecosystem (SSH, Telnet, web, database, simulated NAS) with a log collection and indexing pipeline, dashboards, and real-time alerts.
- All activities carried out with authorization, following responsible disclosure principles.

Mindforge Tech Solutions, Lda 04/2024 – 07/2024
Internship in software and database development

- Development of a hospital management web platform, including the creation and structuring of databases for sensitive clinical information.

Mobnor 05/2023 – 06/2023
Software Development Internship

- Creation of a corporate website focused on usability, web security, and SEO optimization — first professional experience in development.

CERTIFICATIONS

- F1NDX™: OSINT Level 1, 2 and 3 (**Foundations**, **Investigations**, **Advanced Techniques**): Google Dorking, GEOINT, OPSEC, investigation methodology, and due diligence.
- F1NDX™: **Digital Privacy Fundamentals**: digital footprint, account security, and communications privacy.
- Trace Labs: **OSINT Educational Series Badge**, awarded for completing the full OSINT educational series.
- ArcX: **Cyber Threat Intelligence 101**: intelligence cycle, threat vectors, and threat actor profiles.
- ISTEC Porto: **Certificate of Recognition**, awarded for identifying real vulnerabilities in the college's infrastructure through responsible disclosure.

EDUCATION

Bachelor's Degree in Computer Engineering 09/2026 – present
Instituto Superior de Tecnologias Avançadas do Porto

Cybersecurity (CTeSP) 10/2024 – 07/2026
Instituto Profissional de Tecnologias Avançadas do Porto

Computer Systems Programming Management 09/2021 – 07/2024
Escola Profissional de Valongo

PROJECTS

HoneyLab 06/2026 – 08/2026
Self-Hosted Multi-Service Honeypot VM with ELK Detection Pipeline

- Ready-to-import VM (Ubuntu Server 26.04, VMware), with fake SSH, Telnet, FTP, HTTP, and MySQL services, combining medium- and low-interaction honeypots (Cowrie, OpenCanary, SNARE/Tanner).
- Full detection pipeline in ELK 8.x, with GeoIP enrichment, automatic mapping to MITRE ATT&CK techniques, real-time alerts, and anti-fingerprinting hardening.

EyeWeb 02/2026 – 04/2026
Data Breach Verification Platform with K-Anonymity Privacy

- Full-stack platform (Next.js/TypeScript, FastAPI/Python) that checks data exposure without ever sending real data to the server, using local hashing and the K-Anonymity model.
- URL scanner combining Google Safe Browsing, SSL certificate validation, and AI analysis; admin panel with offline MFA and device fingerprinting. Final CTeSP project, presented at Joteca 2025.

More projects available on my GitHub: click here.

EVENTS

Capture the Flag Event Organization 10/2026 – 10/2026
Preparation bootcamp (22/10) and competition (29/10) at ISTEC Porto, with more than 20 teams of 4 members each

- Organization of the college CTF event and creation of the challenges and exercises for both the bootcamp and the competition.

CSCPT Bootcamp 2026 07/2026 – 07/2026
Cybersecurity Challenge Portugal 2026 Final Selection Bootcamp, in Rio Maior, organized by CNCS

- Selected among 30 national finalists, after placing 1st in the online training phase (236 participants) and 13th in the selection CTF.
- Best Portuguese ranking in the international OMNI CTF (786 participants), standing out in OSINT: 203rd place globally, 186th in division, and 5 flags captured.
- 5th place in the bootcamp's internal CTF, in the Forensics and Reverse Engineering categories.

PERSONAL PROFILE

Outside the academic context, I have collaborated in recurring community initiatives, coordinating groups and fostering collective motivation, creative problem-solving, and effective communication, while also acting as a conflict mediator and facilitator of team cooperation.
